No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                        MEYMPMEGGGMSGRPRITSF......QELSSNPPLATILIPPHARI 394

; Sequence 1, Application US/09866712
; Patent No. US20020058637A1
; GENERAL INFORMATION:
APPLICANT: Akihiko TAKASHIMA et al.
; TITLE OF INVENTION: METHODS OF INHIBITING TAU-PROTEIN KINASE I ACTIVITY
INTIBITING NEURONAL CELL DEATH AND TREATING ALZHEIMER'S DISF
KINASE I (AS AMENDED)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        1053 GATGAATTGCGGGACCCAAATGTCAAACTACCAAATGGGCGAGACACACCTGCACTCTTC 1112

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                        US-10-733-816-2
